

Private water supply project

Aims

- Improve our records of premises with private water supplies
- Risk assess their impact on mains drinking water quality
- Share best practice and ensure there are adequate backflow prevention arrangements
- Engage with borehole drillers and installers
- Identify Regulation 8 private water supply systems
- Improve the mapping of these supplies
- Produce clear internal company guidance to prevent creating new or extending existing Regulation 8 private supplies

Water fittings regulations

We would like to attend sites that are either Regulation 8 or have both a private and mains water supply with you to support inspections and verify compliance with the regulations.

To arrange this please email:
